

Interim Reference

Mr. Benjamin Both, born on 20 November 2009, has been assigned to PharmaSens AG since 27 April 2026 through his employer, Hi-Tec-Support GmbH, to support verification testing of medical devices. The assignment takes place during his gap year and provides him with practical professional experience.

PharmaSens AG is an ISO 13485-certified company specializing in the development of insulin pumps. On-site technical supervision and performance assessment are provided by Dr. Radek Skupiński, Head of Verification.

His main responsibilities include:

- Filling and emptying Infusion Modules (IFM) as part of test-item preparation for verification testing
- Precise weighing of test items on a balance accurate to the microgram
- Mounting pumps on test equipment, testing them as part of end-of-line (EOL) inspection, and documenting the results
- Creating and maintaining Excel spreadsheets and developing test procedures
- Operating and testing pumps using the dedicated application software
- Packing, cushioning, and repacking parcels
- Handling email correspondence

Thanks to his strong technical understanding, Mr. Both grasps new tasks quickly and familiarizes himself with new procedures independently. He shows a high degree of initiative, is highly motivated, and approaches his work with great commitment. He carries out all tasks assigned to him reliably, carefully, and conscientiously.

His conduct toward supervisors and colleagues has been impeccable at all times.

Mr. Both has performed his duties to our complete satisfaction at all times.

This interim reference is issued at Mr. Both's request for his records. We greatly value his contribution and look forward to continuing our collaboration until the agreed end of his assignment on 30 September 2026.

Biel/Bienne, 4 August 2026

PharmaSens AG

Dr. Radek Skupiński
Head of Verification
